Radiation and Temperature Effects on the Harmonic and Intermodulation Performance of Mach-Zehnder Optomodulator	14
Experimental Investigation of the Shield Termination Effect on the Field-to-Cable Coupling Level	19
EMC in Malaysia: The First 10-Meter Semi-Anechoic Chamber (SAC) — Inception, Approach and Challenges	23
Electromagnetic Shielding of Expanded Polystyrene Doped with Copper, Zinc and Graphite	28
Computation of Coupled Voltage to an Unshielded Cable Due to Transient EM Fields Radiated by ESD	33
Sampling Criterion for EMC Near Field Measurements	38
Cryptography of the Medical Images	42
Expandable Multi-frequency EIT System for Clinical Applications	49
Conductivity Imaging of Animal and Human Body Using 3T Magnetic Resonance Electrical Impedance Tomography (MREIT)	53
Dual Band Microstrip Antenna Working in the Frequency Bands 2.4 GHz and 5.8 GHz	57
Analysis Different Methods of Microstrip Antennas Feeding for Their Electrical Parameters	62
Wearable Antenna Constructed in Microstrip Technology	67
Coaxial Cables Shielding Efficiency Measuring Methodology	72
The Conducted and Radiated Emission Levels from IT Devices	77
EMC Filters Attenuation Measuring Method	82
NO and N ₂ O Detection with CEAS Method	87
Estimation of Specific Attenuation Due to Scattering Points for Broadband PLC Channels	92
Transmission Analysis of Optical OFDMA-based Passive Optical Network Architecture Supporting Heterogeneous Services	97
Emerging Optical Broadband Access Networks from TDM PON to OFDM PON	102
Scattering Points Size Distribution for Indoor Broadband PLC Channels	107
ONU Monitoring and Management Employing an In-band Ethernet Communication in FTTH/x System	111
Implementing Multiple WiFi Hotspots Using One Single Embedded Platform	115
Particle Swarm Optimization Based Reception Diversity in Rayleigh Fading Channel	119
Maximizing the Probability of Detection of Cooperative Spectrum Sensing in Cognitive Radio Networks	123
A Bandwidth Enhanced Elliptical Metamaterial Antenna	127
Determination of Effective Constitutive Parameters, Material Boundaries and Properties of SRR-rod and Fishnet Metamaterials by Drude/Lorentz Dispersion Models	131
A Compact Hilbert Curve Fractal Antenna on Metamaterial Using CSRR	136
A Simultaneous Cooling and Dielectric Heating: An Advanced Technology to Improve the Yield of Lactides	141
A Coordinate Registration Technique for OTH Sky-wave Radars Based on 3D Ray-tracing and Sea-land Transitions	146

Sea/Land Transition Identification for Coordinate Registration of OTH Sky Wave Radar: End to End Software Simulator and Performance Analysis	151
Investigation of the Transmittance in Superconducting Photonic Crystal	155
Optical Defect Modes in Spiral Media at Active Defect Layer	161
Soliton Cryptography Using Dark-bright Conversion in a PANDA Ring Resonator	169
THz Switching Generation Using a PANDA Ring Resonator for High Speed Computer Communication	173
All Optical Logic NAND Gate Using Dark-Bright Soliton Conversion Control	177
A New Novel GL Isotropic Invisible Cloak without Exceeding Light Speed Wave in Outer Layer of the Double Layer Cloak	181
Lossy Gradient Index Metamaterial with General Periodic Permeability and Permittivity: The Case of Constant Impedance throughout the Structure	190
High Energy Particals and Nanostructures Physics	195
Research on Potential Use of Nanomaterials and Properties in Astrophysics	198
Nano Particle Thermal Stability and Natural Subnanostructures	202
Variation in Wireless-sensing of UHF-RFID Antennas with Insertion of Dielectric Material	206
Reflection Technique for the Determination of Moisture Content in Hevea Rubber Latex	210
MIMO Radar 3D Imaging with Improved Rotation Parameters Estimation	214
High Performance Parallel Implementation of Compressive Sensing SAR Imaging	221
Spaceborne SAR Wide-swath Imaging Based on Poisson Disk-like Sampling and Compressive Sensing	226
High-resolution ISAR Imaging with Sparse-spectrum OFDM-LFM Waveforms	230
SAR Imagery Compressing and Reconstruction Method Based on Compressed Sensing	235
Health Recovery Effect of Physiological Magnetic Stimulation on Elder Person's Immunity Source Area with Transition of ECG and EEG	240
Arousal Effect of Physiological Magnetic Stimulation on Car Driver's Spine Evaluated with Electroencephalogram Using Driving Simulator	245
Characteristic of Human Arm Frequency Radiation	250
Influence of Shield Distance on RF Transmit Performance for a 7T Multi-channel MRI Loop Array ...	255
Estimation of Electromagnetic Exposure Level Based on a Multilayered Model of the Pelvic-hip Region	260
Comments on Some Radio Wave Propagation Mechanisms in the Amazon Region	265
Negative Power Law Attenuation Estimation for Rainy Earth-Space Radio Links	270
A Simple Forwarding Technique for Two-way Relay Channels	277
BICM-ID for Relay System Allowing Intra-link Errors and a Similarity Constellation to ARQ Schemes	281
Turbo-coded CDMA-based Two-way Relaying	287
Differential Distributed Space-time Block Code for Two-way Relay Channel with Physical-layer Network Coding	292
Distributed Algorithm for Multiple Antenna Cooperative Cognitive Radio Networks with Multiple Primary and Secondary Users	297
Distributed Allocation of the Spectrum Sensing Durations for Cooperative Cognitive Radios	303
Collaborative Data Dissemination in Opportunistic Vehicular Networks	308
Ultra Thin Metamaterial Absorbers Using Electric Field Driven LC (ELC) Resonator Structure	314
Comparison of Ultra-wideband Radar Target Classification Methods Based on Complex Natural Resonances	318
Processing of COBRA FMCW SAR Data	322
High Resolution MEMPHIS SAR Data Processing and Applications	328

A Highly-linear Low-power Down-conversion Mixer for Monostatic Broadband 80 GHz FMCW-radar Transceivers	333
Electromagnetic and Gravitational Equations of Rotational Objects	338
The Active Filter for Use in Measurement of the Fast Moving Object	343
Electromagnetic Force and Velocity Curl	348
Limiting Effects in the Application of Inductive Sensors for Measuring of Non-harmonic High-level Current Pulses	353
Temperature Dependencies Measurement, Proposal and Preparing	357
NMR Lens — Technological Limits	361
The Correction of B_1 Errors in Magnetization Transfer Ratio Measurements	365
Measurement of DWI and DTI Images of Isotropic and Anisotropic Materials by Using NMR Methods	369
The Determination of Function G and Air Ion Mobility Spectrum in an Aspiration Condenser with Segmented Inner Electrode	374
MR Perfusion Visualization in 3D Image	380
Calibration of the Apparatus for 3D Magnetic Measurement for EIT	385
Detection of Skull Trauma Using Resistance Tomography	390
NMR Diagnostic and Brain Cancer Treatment	394
X-ray Diagnostics of Non-homogeneous Material by Means of 2D Plane Transformation	399
Analysis of SRR Metamaterials with Controllable Resonance Frequency	405
Measurement of High Frequency Magnetic Radiation in Kuwait	408
Relative Cellular Energy Balance and Biometric Interaction	411
Influence of Variations of Near Earth Electromagnetic Fields on Cerebrovascular System of the Person in Time of Heliogophysical Disturbances	415
Overview of Methods for Magnetic Susceptibility Measurement	420
Algorithms for Electromagnetic Waves on Interface	425
Comparison of Segmentation Methods in MR Image Processing	429
Simulation and Experimental Measurements for Near Field Imaging	433
The Measurement of Diffusion in Plants Tissue Culture	438
Waves and Signals	442
Effects of Multipath Propagation and Measurement Noise in IEEE 802.11g WLAN Beacon for Indoor Localization	447
Correlation Analysis on the Specific Absorption Rate (SAR) between Metallic Spectacle and Pins Exposed from Radiation Sources	452
A Internal Planar Antenna Design for WiMAX Mobile Handset	456
A New Proof of the Non-constancy of Speed of Light in Vacuum and a Simple Solution for the Damped Wave Equation with a Moving Mirror Boundary (Part I)	460
A New Proof of the Non-constancy of Speed of Light in Vacuum and a Simple Solution for the Damped Wave Equation with a Moving Mirror Boundary (Part II)	465
A New Proof of the Non-constancy of Speed of Light in Vacuum and a Simple Solution for the Damped Wave Equation with a Moving Mirror Boundary (Part III)	470
Indoor Positioning Based on IEEE 802.15.4a Standard Using Trilateration Technique and UWB Signal	473
Design of Terahertz Quantum Cascade Lasers for High Temperature Operations Using Non-equilibrium Green's Function Method	478
Mode-locked Yb-doped Fiber Ring-Laser for Use as a Pump Pulse Source of THz-TDS	482
Terahertz Negative Dynamic Conductivity in Optically Pumped Graphene	486

RoF-DAS over WDM-PON Using Bandpass-sampling and Optical TDM Techniques as Universal Entrance Network for Broadband Wireless Access	491
Development of Heterogeneous Radio Access Network Using Radio on Fiber and Its Field Trial	496
Next Generation Free-space Optical System by System Design Optimization and Performance Enhancement	501
λ -tunable WDM/TDM-PON Using DWBA towards Flexible Next-generation Optical Access Networks	507
Reconstruction of a Layered Dielectric Cylinder Using a Split Particle Swarm Optimization	511
On Using Multiple Modes to Reconstruct Conductor Locations in a Power Transformer Winding	516
Shape Reconstruction of a Buried Perfectly Conducting Cylinder by Inverse Schemes	524
Study of Compact Thin-film UWB Antenna with Dual Band-notched Characteristics	529
High-gain Antenna for Base Station Using MSA and Triangular EBG Cavity	534
Statistical Analysis of Microwave Scattering and Attenuation in Randomly Distributed Rainfalls Using Parallel Computation	538
Calculation of Circular Microstrip Antenna Parameters with a Single Artificial Neural Network Model	545
Estimation and Design of U-slot Physical Patch Parameters with Artificial Neural Networks	549
Effect of U-slot Applications on Circular Microstrip Patches Modeling with Artificial Neural Networks on Impedance Bandwidth	554
Bandwidth Modeling of U-slot Rectangular Microstrip Antennas with Artificial Neural Networks	559
A Metamaterial Antenna with Reduced Radiation Hazards towards Human Head	564
Polarization Diversity Unidirectional Antenna for IEEE 802.11a Applications	569
A New Seljuk Star Shape Microstrip Antenna Design	574
A Novel Radiation Enhancement Technique for Multilayer Microwave Circuits	578
Novel M-shaped Defected Ground Structure for Spurious Suppressed Dual Mode Bandpass Filter Design	583
Stepped Impedance Key-shaped Resonator for Bandpass and Bandstop Filters Design	588
Multilayered Miniaturized Hairpin Resonator for Bandpass Filter Design	593
A Stepped Impedance Comb-line Filter Design Using Defective Ground Structure for Wireless Applications	598
Miniaturized Multilayered Bandpass Filter Using Microstrip Hairpin Resonator for C-band Application	602
Compact Lowpass Filter Design Using Cavity Resonator and Ladder-shaped Defected Ground Structure	606
A Novel Bandpass Filter Design Using E-shaped Resonator and Dual Square-loop Defected Ground Structure	610
Study on New Ultrasonic Positioning and Movement Detection Installed in Sensor Network	615
Evaluation of Site Diversity Effectiveness Using Weather Radar Data for Singapore	620
Realization and Characterization of a High-performance SOA-based Multi-wavelength Fiber Ring Laser	626
180 GHz Microstrip Ring Resonator Bandpass Filter on Micromachined Silicon Substrate	630
Novel Tunable Band-reject Filter Using Modified C-shaped Defected Ground Structure	634
Miniaturization and Harmonic Suppression of a Novel Rat-race Coupler	637
MAGIC2D Implicit Particle Pusher Description and Test	641
Synthesis of Composite Materials with Conductive Aligned Cylindrical Inclusions	646
Analyzing Effects of Mobile Dipole Speed on Survey Data via Forward Modeling Technique	650
Numerical Solution of BLT Equation for Inhomogeneous Transmission Line Networks	656
Improvised PEEC Method in the Modeling of the Near-field Coupling with Electrical Cable	661
The Scattering Property Analysis of Metamaterials-coated Object Based on FDTD	665

Analysis of Near-field Optical Disk with a Circular Aperture	669
GMI Effect in Thin Amorphous Microwires for Sensors and Tuneable Metamaterials Applications	674
Effect of Ionospheric Macroscale Inhomogeneities on Radiosignals under Conditions of High-frequency Oblique Heating	680
UHF Propagation Prediction in Smooth Homogenous Earth Using Split-step Fourier Algorithm	685
Radio-frequency Spectrum of Radar Return Signal from Extended Targets	690
Specular Radar Backscatter from a Planar Surface	694
A New Compact Size Fractal Based Microstrip Slot Antenna for GPS Applications	700
Simulation and Verification of Methods for Partial Discharge Source Localization	704
The Development of Methods for Estimation of Time Differences of Arrival of Pulse Signals	709
A Time Domain Analytic Solution for Finite and Perfectly Conducting Ellipsoidal Surface Illuminated by Transient Impulsive Plane Wave	714
Omega-K Algorithm for Bistatic SAR Image Formation	719
Implementation of Space-time Adaptive Processing (STAP) for Target Detection in Passive Bi-static Radar	724
Performance Improvement of a Switched Reluctance Motor	728
Monitoring of Mid-ocean Eddies in the Northeastern Atlantic	733
Satellite Monitoring in Relation to Ekman Transport and Kelvin-Helmholz Billows in Ocean	736
Satellite Monitoring of the Ocean in Relation to Structure of the North Atlantic	740
Improvement of Signal Integrity with Active Metamaterial for Microwave Applications	744
Signal Processing for High Resolution RCS Measurement	747
Quasi-normal Modes and Strong Coupling in a Plasmonic Nanocavity	752
Photon-plasmon Strong Coupling in a Layered Structure	756
Exchange Splitting of Backward Volume Spin Wave Configuration Dispersion Curves in a Permalloy Nano-stripe	760
A Computational Study of the Coupled Emissions between Fluorophores and Gold Triangular Prism Bow Tie	765
Blocking Oscillation Due to Combination of Discrete and Continuous Charge/Flux Transfer in Systems Including Nano/Josephson Tunnel Junctions	768
Calculation of the Acoustomagnetolectric Field in a Rectangular Quantum Wire with an Infinite Potential in the Presence of an External Magnetic Field	772
Microwave Reflectometry for the Diagnostic of Cultural Heritage Assets	778
Investigation of Holographic Radar Capabilities for the Detection of Shallow Buried Plastic Antipersonnel Landmines	782
Microwave Imaging System for the Detection of Buried Objects Using UWB Antenna — An Experimental Study	786
A Review on the Migration Methods in B-scan Ground Penetrating Radar Imaging	789
Topology Optimization Procedure to Minimize Radar Cross Section of Perfectly Electric Conductive Structures	794
Radar Cross Section Analysis of a Square Plate Modeled with Triangular Patch	798
Dual Wideband CPW Fed Dielectric Resonator Antenna	802
Design of a Wide Dual-band Microstrip Antenna for WLANs Applications	806
Relevant Electromagnetic Details for a Couple Antenna-vehicle	812
Reconfigurable E-shaped Antenna with Bandwidth Control for Wideband Applications	816
Frequency-tunable Antenna for Dual-band WLAN Applications	819

CPW-coupled-fed Elliptical Monopole UWB Antenna with Dual-band Notched Characteristic	823
Deep Band-notched Characteristic Using Meander Lines for UWB Monopole Antennas	828
Planar UWB Monopole Antenna with Tunable Notch Band	832
A Novel Transparent TSA for Laptop and UWB Applications	836
Planar Monopole Ultra-wideband Antennas with Different Radiator Shapes for Body-centric Wireless Networks	839
Energy Consumption Reduction by Multi-hop Transmission in Cellular Network	844
Routing Performance of Mobile Ad Hoc Network in Urban Street-grid Environment by Using Peer-to-Peer Propagation Model	848
Observations of the Effect of Temperature upon Stability of Resource-constrained, Embedded Clocks ..	852
On a Useful Tool to Localize Jacks in Wiring Network	856
Shadowing Effect Analysis at Multiple Moving Persons Tracking by UWB Radar	864
Human Shadow Effect Assessment when Integrating Inertial Navigation System with Signal Strength Measurements for Pedestrian Dead Reckoning	868
A Novel 3D Ray-tracing Model for Precise Mobile Localization Application	874
Peer-to-peer Non-line-of-sight Localization in Multipath Environment	878
Multi-user MC-CDMA Using Pseudo Noise Code for Rayleigh and Gaussian Channel	882
Analysis and Design of Triple-band Input Matching for CMOS Low-noise Amplifier	888
A 24 GHz Low-power and High-gain Low-noise Amplifier Using 0.18 μm CMOS Technology for FMCW Radar Applications	892
Design of High Resolution MEMS Accelerometer Using Interdigital Bandpass Filter	897
A Novel Defected Microstrip Structure (DMS) for Microstrip Gaps	902
Frequency Selective Surfaces Based Planar Microwave Absorber	906
Performance Analysis of Complementary and Non-complementary EBG Geometries	910
Simulation of Sensorless Control of Induction Motor Using HIL Method	914
Optimization of Indirect Space Vector Modulation Strategy for Matrix Converter	918
Comparison of Gamma and T Models for Convectur Controlled Induction Machine Drives	925
Simulation of the Matrix Converter Drive with Sliding Mode Control	929
Voltage Converters with Switched-capacitor	934
Modern Control Strategies for Power Active Filter	938
Accurate Measurement Standards and Calibration Techniques for <i>S</i> -parameter Measurements in Coaxial Line System at Millimeter Wave Frequency	943
Establishment of <i>S</i> -parameter Standards of Rectangular Waveguide at Millimeter-wave and THz Frequencies	947
Estimation of Terrestrial Rain Attenuation at Microwave and Millimeter Wave Signals in South Africa Using the ITU-R Model	952
Computational Design and Performance Evaluation of Green Painting Absorbing Material	963
Design of High Performance Low Pass Filter Using Neural Network and Simulated Annealing	968
Numerical Design of Matching Structures for Characteristic Improvement of Finite Periodic Structures	973
Investigation of Spectrally Efficient Transmission in Mixed WDM Systems	977
Investigation of External Electromagnetic Disturbance in HDWDM System	982
The Design of HEV Drive Unit with an Axial Flux Rotary Converter	987
Characterization of the Cerenkov Radiations Generated in Optical Fibers Irradiated by Co-60 Isotope	991
Active Charging Stations for Electric Vehicles Charging	995
Estimation of Induction Machine Electrical Parameters Based on the Genetic Algorithms	999

Equivalent Parallel Capacitance Cancellation Utilizing Coupling between Integrated EMI Filter Components	1003
A Novel Integrated EMI Filter Based on Interleaved Planar PCB Windings and Flexible Foils	1008
Author Index	1013

Asymmetric Y-branch Plastic Optical Fiber Coupler	1029
On the Improved Characterization of the Faraday Effect	1033
The Intensity Modulation of THz-quantum Cascade Lasers by NIR Optical Pulse Injection	1040
Phononic Band Gaps in One Dimensional Mass Spring System	1043
The Influence of the Electromagnetic Wave on the Nonlinear Acoustoelectric Effect in a Superlattice ..	1048
Ability to Increase a Weak Electromagnetic Wave by Confined Electrons in Quantum Wells in the Pres- ence of Laser Radiation	1054
NMR Measurement of the Relaxations and Conductivity of Gel Electrolytes	1060
Phase and Amplitude Control of Optical Bistability in the Closed-loop Three-coupled Quantum Wells	1064
Amorphous Silicon-based Thin Film Solar Cells	1068
Determination of Moisture Content of Maize Kernel (<i>Zea mays L.</i>) by Reflectance Measurement at Wavelengths 300 nm to 800 nm Using Optical Technique	1072
Simulation of High Power GaInNAs-GaNAs Double Quantum-well Laser Diodes for Raman Amplifier Pumping	1075
Three Layers Configuration Microstrip Patch Antenna for Unmanned Aerial Vehicle Synthetic Aperture Radar	1080
Design and Development of a Miniature C-band RF Transceiver for Synthetic Aperture Radar	1083
FPGA-based Pre-processing Unit for Real-time Synthetic Aperture Radar (SAR) Imaging	1087
Performance Evaluation of Modified MLCC Dopple Centroid Estimator	1092
Geometric Correction on SAR Imagery	1097
Design and Analysis of a High Performance Triband 20/30/44 GHz Corrugated Horn	1101
Micro Strip Line Fed I-shaped Dielectric Resonant Antenna for Millimeter Wave Applications	1106
Wideband Isosceles 75°-30°-75° Triangular Dielectric Resonator Antenna	1109
Resonant Frequency and Field Solution of Isosceles Triangular Dielectric Resonator Antenna	1113
Study and Analysis of GUNN Loaded Active Microstrip Patch Antenna	1116
An Explicit Fractional Step Scattered Field Formulation for Modeling General Lossy Media in the FDTD Technique	1121
An Unconditionally-stable FDTD Method with Low Anisotropy in Three-dimensional Domains	1125
SAR Computation of a Human Head Exposed to Different Mobile Headsets Using FDTD Method ...	1131
Transient Electromagnetic Response of a Coaxial Feeding Monopole Antenna Mounted on a Rectangular Metallic Enclosure Illuminated by Electromagnetic Pulses (EMP)	1135
Effect of Electromagnetic Interference (EMI) on the DC Shift, Harmonic and Intermodulation Perfor- mance of NMOSFET Current Mirror	1140
Near-field Characterization of a Printed Circuit Board in the Presence of a Finite-sized Metallic Ground Plane	1146
Improvement of Absorbing Frequency Bandwidth of Composite Electromagnetic Wave Absorber Made of Granular Sendust Particles Dispersed in Polystyrene Resin	1150

Delay Response of Gas Discharge Tubes	1156
Radiation Induced Noise Level in Solar Cells	1160
Radiation Effects in Cooper Pair Insulating Thin Films	1165
Expressing the Measurement Uncertainty of the Non-ionizing Radiation Survey in the Vicinity of GSM Base Stations	1169
Uncertainty Evaluation of Conducted Emission Measurement by the Monte Carlo Method and the Modified Least-squares Method	1173
Radiation Induced Change of Serial PNP Power Transistor's Dropout Voltage in Voltage Regulators ..	1180
Microwave Absorption in Nonuniform Plasma with Different Magnetic Field Configurations Using the Magneto-ionic Appleton-Hartree Theory	1185
The Statistical Character of Atmospheric Noise Temperature Induced by Rain at Millimeter Wave Band in Xi'an, China	1188
On the Influence of Spatial-temporal Fluctuations of Electron Density and Magnetic Field Fluctuations on the Angular Power Spectrum of Scattered Electromagnetic Wave by Magnetized Plasma Slab	1193
An Ultra-wideband CMOS LNA for 3–10 GHz with Low Power Consumption	1198
Design Investigation of a Novel Bandpass Filter Using Trisection Open Loop Resonator	1203
Remotely Controllable Robotic System to Detect Shallow Buried Objects with High Efficiency by Using an Holographic 4 GHz Radar	1207
Design of ARC Filters by Leap-Frog Method	1212
Programme for Synthesis of ARC Leap-frog Filters	1216
Novel Compact Triple-bandpass Filter Using $\lambda/4$ Resonator Pairs with Common via Ground	1220
A New Tunable Dual-mode Bandpass Filter Design Based on Fractally Slotted Microstrip Patch Resonator	1225
The Design of Wideband DC-35 GHz IF Modules for 78–113 GHz Receiver Array	1229
A New High-Q Resonator Using Combination of D-SR and S-SRR with μ -near Zero Metamaterial ..	1233
A Differential-mode Wideband Band-pass Filter for UWB Application	1237
Design of Double-Pole-Double-Throw Bandpass Filter-Integrated Switches	1241
E-band Transmitter Module Using a LCP Substrate	1245
Effect of Finger-patterned Electrodes on Tunability of Tunable Capacitors	1249
Dumbbell Resonators to Reduce Crosstalk on Slotted Ground Plane	1253
An Ultra-low-voltage CMOS VCO Using Parallel Capacitor for Phase Noise Reduction	1256
Research for RFID Tag Implementation in Vehicle Environments	1261
Second Harmonic Reduction of Miniaturized Dual-mode Microstrip Bandpass Filters Using Fractal Shaped Open Stub Resonators	1266
Coupled-line Bandpass Filters Using Mixed Half-wave and Quarter-wave Resonators with Improved Out-of-band Response	1270
Design of K-band CMOS Frequency Divider Integrating a Marchand-type Transformer	1275
Broadband Resistive Active Power Combiner	1279
Triple Band Fractal Koch Antenna for Wearable Application	1285
Determination of Moisture Content of Hevea Rubber Latex Using a Microstrip Patch Antenna	1290
Generation and Propagation of a Stochastic Electromagnetic Gaussian Schell-model Beam	1294
A Software Based Framework for Estimating Patient Displacement in Magnetic Induction Tomography	1299
Effects of Loop Shape, Size and Filling Factor on RF Transmit Performance for a 7 T Multi-channel Loop Array	1304
Radiation Pattern Decoupling for Compact Transmitting Antenna Arrays	1309

Wideband Beamforming for Compact Receiving Antenna Arrays	1313
A Simple Channel Simulator for Multiuser MIMO Broadcast Channel Systems	1317
Influence of the Position of Decoupling Capacitors on RF Transmit Performance for a 7T MRI Loop Array	1323
Side Lobe Level Reduction of Linear Antenna Arrays Using a Hybrid Approach Based on MoM/GA Algorithms	1328
Fixed Beamwidth Electronic Scanning Antenna Array Synthesis and Its Application to Multibeam Pattern Synthesis	1333
Mutual Coupling Compensation for a Compact Array in Direction Finding	1338
Effects of Microstrip Feed Line Width on 1×4 Rectangular Microstrip Antenna Array Electrical Parameters and Estimation with Artificial Neural Networks	1341
Fractal Inspired Patch Antenna on Metamaterial	1346
CPW-fed Slot Patch Antenna for 5.2/5.8 GHz WLAN Application	1350
Method of Moments Analysis for Antenna Arrays with Optimum Memory and Time Consumption ...	1353
Frequency Sensitivity of Lossless Planar Devices by FEM	1357
Classification of Multi-rate CDMA Signals Using Compressed Cyclostationary Features	1361
New Numerical Method for Solving Maxwell Equations with Strong Singularity	1366
Efficiency Enhancement by Harmonic Phase Tuning in Class-F Amplifiers	1371
Compact Microstrip Bandstop Filter with Controllable Triple Stopband Response	1377
The Design of 40 GHz Active Power Splitter	1381
Dielectric Measurement Using a Planar Ring Sensor for Low-loss Powder Form Materials	1385
Linearized 2.4 GHz Power Amplifier	1389
Sequential Tuning of Waveguide PIN Diode Limiters	1393
Dynamics of a System of Bilaterally Coupled Chaotic Gunn Oscillators	1398
Application of PSO Algorithm for Optimizing the Dimensions of Tunable Interdigitated Capacitor ...	1401
A Novel Passive Dual-band Bandpass Microwave Filter Using Microstrip Loop Resonators	1407
A Miniaturized Dual-narrowband Bandpass Filter Using Microstrip Open-loop and Complementary Split Ring Resonators (CSRrs) for Personal Communication Systems (PCS's)	1411
A Novel Miniaturized Narrow Band Bandpass Filter Utilizing Microstrip Open-loop Ring Resonators for Narrow-band Applications	1415
A New Wavelet Space Time Coding Technique Designed for UWB MISO Systems	1420
Linear Regression Route Roughness Parameter to Correct Hata Path Loss Prediction Formula for 1800 MHz	1429
Impact of Wireless Channel Modeling on SAR Estimation in Indoor Environment	1432
Analytical and Experimental Study of Spatial Focusing by UWB Time-Reversal in Indoor Environment	1436
Characterization of the Polarization of Received Electromagnetic Waves in Indoor Communication Channels	1441
Genetic Algorithm Optimization Tool for Multi-user Detection of SDMA-OFDM Systems	1446
Methods for the Assessment of the Performance of Short-range Multi-hop Wireless Network Communications	1451
A Rigorous Measurement Technique for Radiation Pattern Characterisation of Embedded Wireless Communication Systems	1456
Characterization of Indoor 30 GHz Bandwidth Multipath Channel Propagation	1460
RFID and Bluetooth Technology for Tagging and Transmission of Data to POS (Point of Sale)	1464
LTE-FDD and LTE-TDD for Cellular Communications	1467

A RFID Reader Suppressive Interferences Due to Multipath	1472
Measurement and Parameter Description of Time-varying Ultra-wideband Infostation Channel	1476
Small Loop-type Mobile Antenna with Less Interference of Nearby Conductors for Wi-Fi Application	1480
Analysis of Cable Effects in Portable Antennas	1483
Size Reduction of Patch Antenna Array Using CSRRs Loaded Ground Plane	1487
Design of Internal Multi-band Mobile Antenna for LTE700/WCDMA/UMTS/WiMAX/WLAN Operation	1490
Planar UWB Antenna with WLAN/WiMAX Dual Band-notched Characteristics Using the Hilbert-curve Slots	1494
Reconfigurable Omnidirectional Loop Antenna with Left-handed Loading for RFID Applications	1498
Millimeter-wave Design of Broadband Active Integrated Microstrip Patch Antenna	1501
A Dual Bevel Compact Planar Monopole Antenna for UHF Application	1506
A UWB MIMO Spatial Design Effect on Radiation Pattern	1510
Harmonic Rejection Triangle Patch Antenna	1514
A New Fractal Based Printed Slot Antenna for Dual Band Wireless Communication Applications	1518
Performance Evaluation of Three Rectangular Patch Element Array Antenna Conformed on Small Radius Cylindrical Surface	1522
A New Fractal Based PIFA Antenna Design for MIMO Dual Band WLAN Applications	1526
A New Compact Ultra Wideband Printed Monopole Antenna with Reduced Ground Plane and Band Notch Characterization	1531
The Antenna Feed Structure with the Wide Impedance Bandwidth	1537
A New CPW-Fed C-slot Based Printed Antenna for Dual Band WLAN Applications	1541
Analysis and Simulation of Electric Field Intensity from a Half-wave Dipole Antenna in Open Area Test Site	1546
Impact of Spacing and Number of Elements on Array Factor	1550
Analysis of Multi Turn 4-Arm Archimedean Spiral Antenna with Varying Spacing between Arms	1554
Compatibility between Cognitive Radio and the Terrestrial Digital Broadcasting Services in the Digital Dividend Band	1559
The Digital Dividend Spectrum in Asia	1564
Analytical Unit Pulse Propagation in an Active Single Resonance Lorentzian Medium	1568
System Power Integrity Impact by Package Power/Ground Balls Assignment	1573
Applicational Effects of an Atmospheric Pressure Plasma Device	1577
Terahertz Emission by Atom in Multicolor Laser Field in Ionization-free Regime	1581
Simultaneous Measurement of Stress, Temperature and Refractive Index Using an PMFBG Cascaded with an LPG	1584
QoS-based Genetic Expression Programming Prediction Scheme in the EPONs	1589
Performance and Confidentiality Comparison of Different Hybrid SAC/OCDMA-WDM Overlay Schemes	1594
2D Fiberoptic Metal Profile Detector	1600
Gain Flattening in Erbium Doped Fiber Amplifiers by Use of a Coaxial Fiber	1605
A Proposed Method for Sensitivity Analysis of Log-periodic Dipole Antenna Array-type Optical Electric Field Sensor	1610
Design of Undersampled Digitally Heterodyned SFGPR with Variable Sampling Frequency	1615
Checking of Combustion Chamber of Rocket Using ECT with AMR Sensor	1620
SWB: An Analysis and Visualization Tool for COSMO SkyMed	1623

High-gain and Light-weight Antenna for Radar System Using a Horn Covered with Curved Woodpile EBG	1628
Gain Improvement of Curved Strip Dipole Using EBG Resonator	1631
A New Feed for Reflector Based 100Ω Impulse Radiating Antenna	1635
A Dielectric Loaded HMSIW <i>H</i> -plane Horn Antenna	1640
On the Radiation Fields of the Hyperbolic Helical Antenna	1644
Analysis of a Circular-loop Zigzag Thin-wire Antenna	1648
On the Insulated Dipole Antenna in a Dissipative Non-conducting Medium	1655
A Planar Resonator Antenna Using Folded Dipole with Reflective Walls	1658
Reduction of EMI due to Antenna Radiation inside Complex PCB	1661
Fast Adaptive Least Mean Square Algorithm	1666
Nonlinear Effects of Electromagnetic TM Wave Propagation in Anisotropic Layer with Kerr Nonlinearity	1670
Electromagnetic TM Wave Propagation through a Nonlinear Metamaterial Layer with Arbitrary Non-linearity	1676
Wave Equation in the Electromagnetic Field with Velocity Curl	1681
Optical Neural Router Consisting of Acousto-optic Waveguide-type Switches for Adaptive Network ..	1686
Spatial Sampling Characteristics of Beam Wave Eigen Functions Representation for Optical CT	1692
Axisymmetric Electric and Magnetic Field Calculations with Zonal Harmonic Expansion	1698
Dispersion Characteristics of Hyperbolic Waveguide for Weak-guidance	1703
Design of 120 GHz, 1 MW Gyrotron for Plasma Fusion Application	1708
Investigation of a Disc-Loaded Gyro-TWT Using Particle-In-Cell Simulation	1712
Design of Higher Harmonic Interaction Cavity for 0.3 THz Gyrotron	1717
Study of Stagger-tuning in the Gyroklystrons	1720
Power and Frequency Estimation for 0.67 THz Gyrotron for Radioactive Material Detection	1725
Swarm Optimization of Raised Cosine Non-linear Cylindrical Waveguide Taper for High-power Applications	1729
Eigenmode Analysis of Metal Photonic Band Gap Cavity for Gyrotron Operating in Higher Order Mode	1734
A Triple-bandgap Uni-planar EBG Structure for Antenna Applications	1739
A Terahertz Meta Surface Filter Employing Sub-wavelength Metallic Apertures on a Thin Substrate ..	1744
A Broadband Photolithographic Polariser for Millimetre Wave Applications	1748
Design and Characterization of a Dielectric Q-plate for Millimetre-wave Photon Orbital Angular Momentum Applications	1752
Dog Bone Triplet Metamaterial Wave Plate	1756
Millimetre Waves Photolithographic Polariser Beam Impact	1761
Maxwell's Transfer Functions	1766
Novel Analytic EM Modelling of Antennas and Fields	1771
A New View of Spectral Analysis of Linear Systems	1776
Complex Parameterization of the Lossy Transmission Line Theory	1781
Channel Base Current Effects on the Magnetic Flux Density Waveshape Associated with Vertical Lightning Channel	1787
Optical Classification and the Absorption Character of Inland Entrophic Water in China	1792
Automatic Detection Algorithms for Oil Spill from Multisar Data	1796
3-D Coastal Water Front Visualization Using RADARSAT-1 SAR Satellite Data	1801

Digital Elevation Model of Spit Using Dinsar of Radarsat-1 Fine Mode Data	1805
Design of Reconfigurable Slot Antenna for Diverse Frequency Wireless Applications	1810
A Single Feed Circularly Polarized Wallis Sieve Fractal Microstrip Antenna	1814
Flat Lens Based on Aperture-coupled-patch FSS with Four-pole Resonance Behavior	1818
Analysis on Physical and Electromagnetic Parameter of a Concentric Split Ring Square Reflectarray Element	1822
A Novel Design of Dual-feed Single-element Antenna for 4G MIMO Terminals	1827
Circularly Polarized Multiband Microstrip Antenna Using the Combination of Novel Fractals	1832
An Equivalent Circuit of Microstrip Slot Coupled Rectangular Dielectric Resonator Antenna	1837
Low Cost, Efficient, High Gain and Wideband Microstrip Antenna Fed Yagi Array in Fabry-Perot Cavity	1841
Parallel Metal Plated U-shape Ultra-wide Band Antenna with WLAN Band-notched Characteristics ..	1846
Necessity of Quantitative Based Thermographic Inspection of Electrical Equipments	1852
Analysis and Prediction of Temperature of Electrical Equipment for Infrared Diagnosis Considering Emissivity and Object to Camera Distance Setting Effect	1856
On the Construction of Dirac's Delta Functions from Poisson's and Maxwell's Equations	1860
On the Construction of a Hierarchy of Lower Dimensional Auxiliary Boundary Value Problems for Solving Real-life Problems in Engineering Applications	1865
On the Construction of Distributed Elementary Source Self-regularized Dyadic Green's Functions	1870
Numerical Experiments for Radial Dynamics and Opacity Effect in Argon Plasma Focus	1875
Microwave Characterization of Expanded Graphite/Phenolic Resin Composite for Strategic Applications	1880
Kalman Filter for ABR Signal Analysis	1885
Wave V Detection Using Continuous Wavelet Transform of Auditory Brainstem Response Signal	1889
Malay Speech Digit Recognition for Speech Therapy Application	1894
Comparison of Different Time-domain Feature Extraction Methods on Facial Gestures' EMGs	1897
Standalone ECG Monitoring System Using Digital Signal Processing Hardware	1901
Heart Sound Analysis Using Hidden Markov Models	1905
High-Q Transmission Line Stub Resonators Using Interdigital Capacitor Loading for MMIC Applications	1909
Spatial Change of Normalized Radar Cross Section of Ocean Surface for HF Ocean Surface Radar due to the Wave-current Interaction Around Eddy	1913
Maxwell Sumudu Based Magnetic Solutions	1921
Dual Band Antenna with Paired Excitation for Reduced Cross-polarisation	1924
Design of a Digital Synthetic Aperture Radar	1926
Experimental Studying the Nonlinearity Effects on Adaptive Nulling	1928
Author Index	1932
