LTE Baseband DSP/FPGA for Beam-space MIMO RF Antenna	27
Dynamical and Stochastic Approach to Non-linear Polarization Optics	31
Calculations of Inductance and Induced EMF in a Planar Pickup Coil	36
Time Delay Module Design, Simulation and Synthesis Based on FPGA for Dielectric Dispersion Logging	41
Geometry and Its Physical Meaning	45
Efficient Analysis of EM Scattering from Rotating Structures Using a Fast Iterative Physical Optics Method	51
Modeling the Scattering by Small Holes	56
Compact Circularly Polarized RFID Tag Antenna with an Embedded L-shaped Feedline for Metallic Objects	61
Microwave Dielectric Properties of BiNbO ₄ Ceramics	65
Chaos Generation Utilizing Optically Square-wave-injected Semiconductor Lasers	69
Photonic Band Structure and Field Distribution for TE Polarization. High Plasmon Concentration in the Corners of Metallic Rods of a 2D Photonic Crystal	73
The Dispersion Properties of Three-dimensional Magnetized Plasma Photonic Crystals as the Mixed Polarized Waves Considered	78
Zn Concentration, Shape and Size Effects on the Band Structure of Photonic Crystals Based on Ferrofluids with (Co _{1-x} Zn _x Fe ₂ O ₄) Nanoparticles	83
Analysis on the Aperture Averaging Weight Factor for Equidistant Dual-aperture Receiver	88
Trend Technology's Theory Model and Experiment Verification for Atmospheric Optical Scintillation ..	92
Electromagnetic Simulation of Coupled Silicon and Diamond Microdisks and Slab Waveguides in the Mid-infrared	95
A Photonic QPSK Modulator Aimed at Space Applications	99
Optoelectronic Applications of Sapphire Microspheres	104
Silicon Microspheres in Metrology	108
A Moment-method Analysis of a Thin-wire Chireix-coil Antenna	112
A Frequency Reconfigurable PIFA Design for Wireless Communication Applications	118
An Accurate Technique to Model the Substrate of Wearable Textile Antennas	122
A CMOS I/Q Up-conversion Mixer and a Power Pre-amplifier for UHF RFID Reader Systems	125
A UHF RFID Reader Receiver SoC in 0.18 μm CMOS Technology	130
Compact Substrate Integrated Waveguide BPF for Wideband Communication Applications	135
A Compact Dual-band Bandstop Filter Based on Fractal Microstrip Resonators	140
Design of Evaluation Board with a Built-in 25 Gb/s PRBS Source for Testing High-frequency Probe ..	145
The Optimized Electrode between a SMPM Connector and a Microstrip for High Frequency Applications	149
High Frequency Performance Comparison among Three Kinds of Board to Wire Connectors	153

An Investigation of Equatorial Ionospheric Irregularities under Solar Maximum in the 24th Solar Cycle in Middle and East Africa Using GPS	157
Assessment of the Forest Disturbances Rate Caused by Windthrow Using Remote Sensing Techniques	162
Monitoring Land Use Change in South-west Romania Using Multi-temporal Landsat Remote Sensing Imagery	167
Looking for a Biophysical Approach to Early Stages of Chronic Kidney Disease	171
Steps towards a Biophysical Approach to Refractory Gynecological Infections	175
FEM Evaluation of the Novel Cardiac Defibrillation Electrode Placement	179
Conductivity Estimation of Breast Cancer Using Stochastic Optimization	185
EM Exposure System with Well Defined Dosimetry	191
Mutual Coupling Evaluation within Waveguide Slotted Antennas	195
An Adaptive Spectroellipsometric Technology for the Diagnosis of Water Ecosystems	199
Wideband Dual-mode Dielectric Waveguide with Applications in Millimeter-wave Interconnects and Wireless Links	203
Development of Wireless Power Induction Cooker Using Magnetic Induction-based Technology	207
Miniaturized Transmitter in Digital Modulation System with Non-constant Envelope for VHF Band ..	210
Nonlocality in Discrete Metamaterials	214
Pure Electric and Magnetic Hotspots by Dielectric Cylindrical Dimers	218
Controlled Photonic Surface Modes in ‘Cholesteric Liquid Crystal — Phase Plate — Metal’ Structure	224
An Efficient and Innovative Modelisation for Nanolasers	228
THz Twist Polarizer Based on Supramolecular Fermat’s Spiral Chiral Metamaterial	233
The Lidar Sounding of the Atmosphere in St. Petersburg	238
A 16-Element Wideband Microwave Applicator for Breast Cancer Detection Using Thermoacoustic Imaging	243
High Resolution Range Imaging via Model-based Compressed Sensing	248
Fast Level Set Based Method for High Contrast Microwave Imaging	253
On the Connection between Jones Matrix and Sinclair Matrix	258
Detection of Breast Tumors by Applying FDTD Modelling of Holographic Radar	263
Characterization of the Electromagnetic Propagation through Building Rubble by Means of Numerical Random Models	267
Combined Breast Microwave Imaging and Diagnosis System	274
Internal Photoeffect under the Action of Ultrashort Electromagnetic Pulses: Dependence of Pulse Duration	279
High Definition Multimedia Interface in the Process of Electromagnetic Infiltration	282
Analyze the Impact of Discretization on the Structure of the Simulation Result	287
Directed Energy Applications to the Destruction of Informatic Devices	292
Measurement of the Pulses Generated by the High Power Electromagnetic Pulse Generator	297
Theoretical and Experimental Analysis of the Impact of Conformal Surface on Parameters of Microstrip Antennas	302
Analysis of Distinctive Features and Database Conception for Hardware Interface of IT Devices in the Process of Their Identification Based on Radiated Emission	307
The Analysis of the Radius Impact on the Properties of Cylindrical Antenna with Coaxial Feed	312
Implementation of Universal RF-shielded Enclosure for IT Equipment Protection	317
The Exposure Level of High Power Microwave Pulses	321
Electromagnetic Compatibility Studies of Selected Components for Present Day Cars	326

Bandwidth Enhancement of a Microstrip Patch Antenna Using the Metamaterial Planar Periodic Structure	330
Computing the Electric and Magnetic Green's Functions in General Gyrotropic Media	335
On the Theory of Transition Radiation in the Anisotropic Magneto Dielectric Plate in a Waveguide ...	340
Scattering of an Obliquely Incident Electromagnetic Plane Wave by an Array of Magnetized Plasma Cylinders	344
Theorem for the $G_1(c, n)$ Numbers	349
Inverse Spectral Theory and Kramers-Kronig Relations	356
Algebraic Regularization of Universal Functions in EM via Self-induced Hadamard Finite Parts	359
On the Accuracy of Method of Moments for Solution of Full 3D Vectorial Electromagnetic Forward Scattering Problem	365
Fast Model Order Reduction Approach to Uncertainty Quantification in Electrokinetics	369
Uncertainty Quantification for Complex RF-structures Using the State-space Concatenation Approach	374
Application of Krylov-type Parametric Model Order Reduction in Efficient Uncertainty Quantification of Electro-thermal Circuit Models	379
Broadband Analysis Including Beam Steering of Phased Array Antennas by Order Reduction	385
Parametric Near-field-to-far-field Transformation by Precomputed Empirical-interpolation Patches ...	390
Electromagnetic Scattering-matrix Theories Based on Plane Waves and Complex-source Beams	398
Flow Aggregation and Migration Scheme Based on Real-time Monitoring for Time-varying Traffic in Optical Networks	403
Impact of Protection to Converged Access Networks Planning in Rural Areas	408
Programmable Photonics in Data Centers: Architectures and Algorithms	413
Dissipation-induced Super Scattering from PT -synthetic Plasmonic Metafilms	418
Statistical Models of Noise Distribution in Broadband PLC Networks	423
High Quality InAlAs on InP for High Sensitivity Photodiodes	430
Finite Element Analysis of Separation Force on Non-ferrous Metals Induced by Eddy Current Separator	434
Numerical Estimation of Muscle Conductivity in Terms of Human Body Internal Resistance	439
A Necessary Condition for Application of Topological Derivative in Limited-aperture Inverse Scattering Problem	442
Subspace Migration for Imaging of Thin Electromagnetic Inhomogeneities without Shape Information	447
Analysis of Matching Media Effect on Microwave Brain Stroke Imaging via a Spherically Symmetrical Head Model	452
High Resolution Ka-band Backscattering Measurement of Deciduous and Coniferous Tree	457
Investigation of Switched Reluctance Machine for EV Propulsion Unit with Torque Smoothing Strategy	463
Achieving Tunable Mode Splitter and Omnidirectional Absorber by Semiconductor Photonic Crystal ..	469
Tunable Electromagnetically Induced Transparency Like Transmission in Graphene Metamaterials with Indirect Coupling	473
Reversal of Microwave Propagation Nonreciprocity in Metastructures by Voltage Application under Ferromagnetic Resonance Excitation near Resonance of Dipole or Chiral Elements	477
Millimeter-wave Metamaterial Antenna in Standard CMOS Technology	482
Enhanced Group Velocity Characteristics of a ENG Cladded Metamaterial Loaded Helical Guide	486
Influence of Optical Fiber Dispersion on Mamyshev Type Regenerator Performance	489
Characteristics of Femtosecond Pulse in Silicon Nanowire Embedded Photonic Crystal Fiber: Variational Approach	493
Optical WDM-PON Access System with Shared Light Source	497

Estimation of EDFA Performance in 40 Gbit/s 8 Channel DWDM Transmission System	502
Bidirectional Radio-on-Fiber Transport Systems Using Fiber Nonlinearity and Injection Locked Technique	506
Transponder and 3R Regenerator Impact on Energy per Bit and Optical Bandwidth Required for Data Transmission over 10-40-100 Gbps Mixed-line Rate WDM Links	510
Diffraction Effects on a Dual External Cavity Tunable Laser ECTL Source	514
A Generalized Vector-potential Integral Formulation for the Paraboloidal Reflector Antenna	519
A Compact Dual-band Balanced Slot Antenna for LTE Applications	524
Novel Quadrifilar Helical Antenna for RFID Applications Using Genetic Algorithms	528
A Compact Tri-band Monopole Antenna with Multiple Meander Lines for WLAN and WiMAX Communication Applications	533
Low-cost Implementation of a Waveguide-based Microwave Filter in Substrate Integrated Waveguide (SIW) Technology	537
Band-pass Filter Based on Magnetolectric Composite at Electromechanical Resonance	542
Yagi Rectenna Application to Increase the Battery Lifetime of Sensor Nodes	545
A Model-free Method for Real-time High Precision Carrier Phase Observation	549
Real-time Processing Technique for Panoramic Infrared Imaging System	553
Monitoring for Resonant Mode of High-way System at Impulsive Impact	558
Examples of Electromagnetic Field Sources in an Indoor Distribution Substation	561
Emission of Smart Meter Electric Fields (50–100 kHz) in Finland	565
Smart Receiver for Multi-antenna Transmitters with Constellation Shaping	568
Impact of Aeronautical Mobile Telemetry System on MFCN SDL Operating Co-channel in Frequency Band 1452–1492 MHz	575
The Influence of Atmospheric Radio Refractivity on the WiMAX Signal Level in the Areas of Weak Coverage	580
Evaluation of LTE 700 and DVB-T Electromagnetic Compatibility in Adjacent Frequency Bands	585
Möbius Strip with Back-to-back CPW Transmission Line: Simulation and Microwave Characterization	590
Microwave Magnetolectric Isolator-attenuator Based on Coplanar Line	594
Modeling of Microwave Magnetolectric Devices	597
Equalization of EDFA Gain Spectrum and Increase of OSNR through Introducing a Hybrid Raman-EDFA Solution	600
Beam-footprint Detection for Non-cooperative Spaceborne/Airborne Bistatic SAR	604
Studies of the RF Energy Delivery Mechanism and Its Reformation in the Low Pressure ICP Discharge	609
Single Feed Dualband Miniaturized E-shaped/U-slot Patch Antenna	615
Simulation and Study of the Effects of EM Radiations on Cantilever Beams with RF Functionality	622
Performances Evaluation of a Magnetic Gear with High Transmission Ratio Used for High Speed Applications	627
An Efficient Progressive Phase Distribution Consideration of Reflectarray Antennas	632
Problems of Statistical Decisions for Remote Monitoring of the Environment	639
Simulation Evaluation of the IEEE 802.11ac ad-hoc Network for Voice Communication in Emergency Scenario	644
Improvement of the Radiated Immunity Test Using a Broadband Signal	650
Study of a Wide-band Strip Line Couplers' Susceptibility Based on the Number of Transmission Lines with Non-uniform Impedances	654
Steady-state Analysis of Permanent Magnet Synchronous Machine for Integrated Starter-alternator Applications	658

Prediction of Temperature and Stress in a Multi-stage Depressed Collector under Different Environmental Conditions	664
Erbium-doped Fiber Laser with Distributed Feedback from a Fiber Grating Array	666
Conditions for Negative Refraction and Negative Refractive Index in Lossy Media	670
Spatially Dispersive Inhomogeneous Dielectric Wire Media with Periodic Structure	675
Efficient Imaging of Dielectric Targets Based on Contrast Source Inversion Method	681
On Constructing Globally Convergent Algorithms: Applications to GPR and Marine CSEM Sounding	685
Raw Data Generation of Maritime Scenes Using MOCEM V4 and PHYS-IQ V1	690
Prediction of Signal Fadings in Air Radio Communications	695
The Reflectivity of the Ni-Zn Ferrite Tiles in the Microwave Frequency Range	700
Modelling of the Angle of Arrival Scattering Using the Von Mises Function for Compatibility Analysis	705
Influence of the Environment on the Cross-sector Compatibility in Wireless Access System	709
Mobile Recorder for Electrical Activity of the Heart	713
Implementation of a Steganographic Algorithm in an Internet VoIP Phone	718
Multimedia Filter for Data Hiding Counteraction	722
A Dualband Circularly Polarized Rectangular Dielectric Resonator Antenna with L-shaped Slots on the Ground	726
Bidirectional Dielectric Resonator Antenna Using Slotted Ground Structure	729
Impact of Bending on the Performance of Circularly Polarized Wearable Antenna	732
Design and Optimization of Miniaturized Dual-band Implantable Antenna for MICS and ISM Bands ..	738
A New Approach to Diffraction in Volume Gratings and Holograms	742
Regular Coulomb Wave Function Method for Analysis of the Azimuthally Magnetized Circular Ferrite Waveguides	747
Undersampling to Regularize the Source Reconstruction Problem for an Electric Point Source	754
Cascades of π Circuits Modeled by Independent Matrix Equations for Each Infinitesimal Unit	759
Whistler Modes Guided by Enhanced Density Ducts in a Nonresonant Magnetoplasma	766
Hybrid TEM Wave Radiation from a Coaxial Waveguide with a Semi-infinite PEC Outer Cylinder and an Infinite Inner Cylinder Loaded with Partial Impedance	771
One Way Speed of Light and Why Nothing Can Be Faster Than Light	776
Experimental and Numerical Analyses of Leakage Flux Distribution in Core-type Voltage Transformers	780
Multi-layer Transmission of Spoof Surface Plasmon Polaritons	785
Analysis of EM Shielding Effectiveness of CNT Films Based on TEM Cell Electric and Magnetic Coupling Fields	788
Thermal Imaging of RF Induced Heat Loss in a Microwave Metamaterial Absorber	793
Analog Multiplexer with an Improved High Linearity Bootstrapped Switch for Multi-channel Neural Signal Recording	797
A 2 GSps 8 bit Folding & Interpolation ADC in 90 nm CMOS Technology	802
10 bit 100 MS/s SAR ADC with Reduced Loop Delay	807
High Speed Pipelined ADC Uses Loading-balanced Architecture	811
A 30-GHz Low Phase Noise LC VCO and Frequency Divider in 90-nm CMOS Technology	816
A 45-GHz CMOS Low-power LNA Using Active Feedback	820
A Varactor-based Tunable Microstrip Band Pass Filter	824
An Optimized Opamp-sharing in 2nd Order $\Delta\Sigma$ Modulator Based on Changing the Stages Output Capacitance Timing Strategy	827

A 4MHz-10-GHz, 10-ps/dec Dynamic Comparator Using Negative Resistance Combined with CMOS Input Pair	831
Binary Mixtures of Chiral Gases	835
A Novel Ka-band Spatial Combiner Amplifier: Global Design and Modeling	840
Formation of One-dimensional Image by Pulsed Light Diffraction on Running Sound Wave	846
RF Design of Input Cavity Structure of a Low Frequency, High Average Power IOT	850
Polarization Sensitivity Mitigation for AM-CO-OFDMA PON Uplink Transmission	854
Optically Controlled Triple Notched UWB Antenna	858
Multicomponent Rogue Waves	861
F-band Millimeter-wave Signal Generation for Wireless Link Data Transmission Using On-chip Photonic Integrated Dual-wavelength Sources	866
Design and Simulation of Ultra-compact 25-Gbit/s Directly-modulated V-cavity Tunable Laser at 1310-nm Band	870
Self-homodyne Detection in Optical Coherent Transmission Using Extracted Carrier as the Local Oscillator by Saturated SOA	875
THz Oscillations in DNA Monomers, Dimers and Trimers	879
Formation of Caustics by Refraction of Structured Laser Radiation in the Diffusive Layer of Liquid ...	884
Self-organizing And Filamentary Behaviour in Broad-area Lasers	888
Hydrogen and Humidity Sensing Based on WGMs of Elastic Polymer Optical Microresonators	892
Electron Beam Detection by Induced Resonance in Cylindrical Cavity	896
Low-loss Millimeter-wave Phase Shifters Based on Mechanical Reconfiguration	902
Tunable Periodic Deflector Structure Based on Ferroelectric Materials	908
Point-to-point Radio Link Variation at E-band and Its Effect on Antenna Design	913
60 GHz Antenna on Metallic Nanowired Membrane Substrate	918
Analysis of Sampling Grids for Spherical Near-field Antenna Measurements	923
A Dual V-band Push-push VCO Using the 0.18 μm CMOS Process Technology	928
Spatial Power Combiner Technology	932
Using Microwave Radiation for Porcelain Tableware Sintering	939
Design of Complex Metal-dielectric Diffraction Gratings	944
In Re Electric Switching Sense of Microwave Magnetic Field Rotation near Varactor-loaded Dipole Excited by a Plane Wave	949
Analysis of EMG Waves from a Pulse Source	954
Propagation of Fluorescence Radiation through μ -capillary Holes of Glass Micro-channel Plate	959
Diffraction by Arbitrary-angled Dielectric Wedges: Closed Form High-Frequency Solutions	964
Analysis and Design of a Wideband Low Phase Noise LC VCO	968
Adaptive Beam-forming Optimization Based Hybrid PSO/GSA Algorithm for Smart Antennas Systems	973
Semiconductor Temperature Tunable Metamaterial for Terahertz Applications	978
Noise Spectroscopy Tests in the Analysis of Materials and Periodic Material Structures	983
Supercontinuum Generation in a Silicon Nanowire Embedded Photonic Crystal Fiber	989
Dispersion Characteristics of Zinc Oxide Nanorods Organized in Two-dimensional Uniform Arrays ...	994
Dynamical Evolution of the Laser Linewidth at Switch-on	999
Transmission Properties of THz Silicon Photonic Crystal Fiber	1004
Collapse of Nonlinear Terahertz Pulses in n -InSb	1009
Resonant Antenna Design Employing Equivalent Circuit Mode	1014

Flexible PIFA Antenna Design for Wireless Sensor Networks in Wearable Healthcare Applications . . .	1017
Dual-band Printed Antenna for WLAN Applications	1020
Unequal Power Divider Using Series RC Circuit for Improved Isolation	1024
Microwave Amplifier Design for Solid State Radar Transceivers at X-band	1028
THz Generation of Bloch Oscillators from SiC Structures due to Strong Electric Fields	1033
Electromagnetic Emission Analysis of a Multiband EMI Filter Based on Sub-wavelength Resonators .	1038
Overhead and Cable Transmission Lines Magnetic Fields: Standardization, Estimation, and Design .	1043
Electromagnetic Compatibility of Contactless Power Transfer Modeled in FEM Analysis Software . . .	1048
Parallel Imaging Based on Multicore DSP for FMCW SAR	1053
Monitoring of Buoyancy Effects to Structures by Tsunami Water after Heavy Seismic Shocks	1058
Monitoring of Orographic Patterns in Relation to Tsunami Earthquake	1061
An Efficient Approach of Lengthening Battery Age and Working Hours through Redistributing Battery Packs	1064
An Accurate Estimation for the State of Health of Lithium-ion Batteries by Using Fuzzy Logic System	1068
Estimation of Equivalent Model Parameters for LiFeO ₄ Batteries Based on Particle Swarm Optimization	1072
Noncoherent Detection for Multi-hop Amplify-and-forward-based Multi-branch Cooperative Diversity Systems	1077
A New Design of High-speed Decimal Direct Digital Frequency Synthesizer	1083
Coverage Impact for Data Traffic Profiling in WCDMA Networks	1087
A Nyström-based Approach for Solving Time-domain Magnetic Field Integral Equation	1092
A Hybrid Scheme for Solving Transient Electromagnetic Problems with Conductors	1096
Influences of High Relative Humidity on Extremely Low Frequency Electric Field Measurements	1100
Examples of Variation in Measured ELF Electric Fields under 400 kV Power Lines	1104
Possible Methods for Limiting Exposure to the Electric Fields of High Voltage Power Lines on Active Implantable Medical Devices in the Human Body	1107
Programmable Fiber-based in-band OSNR Monitoring for Flexgrid Coherent Optical Communication System	1111
Dual Source Railway Vehicles	1115
Design of Slot Planar Applicator for Local Thermotherapy	1120
Array of Spiral Applicators for Local Thermotherapy	1124
Simulation on Power Handling Enhancement for the Ohmic Contact RF MEMS Switch with Micro-spring Structure	1128
Evaluation of Electromagnetic Interference Emitted from Compact Fluorescent Lamps According to CISPR-15	1133
Analysis of the SMOS, MODIS and GCOM-W1 Data during the Growing Season in the Southern Part of the Western Siberia	1137
A Spread Spectrum Clock Generator Using Discontinuous Modulation Technique for Reduction of Time Interval Errors	1141
Effect of Neutral Grounding Methods on the Earth Fault Characteristics	1144
A Novel Ultrathin CdS/CdTe Solar Cell with Conversion Efficiency of 31.2% for Nano-area Application	1152
High Gain Printed Monopole Arrays for Wireless Applications	1156
Technology Advances in GNSS High Precision Positioning Antennas	1160
Travelling Wave Antennas with Semitransparent Surfaces for Forming a Cutoff Pattern	1168
Parametric Analysis and Optimisation of a 8–18 GHz Quad-ridged Horn Antenna	1172

Suppression of Light Scattering with ENZ-metamaterials	1178
THz Characterization of ITO Films on p-Si Substrates	1182
Coupled Resonator Mediated Transmission of Light through Sub-wavelength Holes for Multispectral Imaging Applications	1187
MM-wave-to-THz Modulation with Graphene-oxide-silicon Etalon Structures	1192
High Sensitive Ammonia Gas Sensor Based on Graphene Coated Microfiber	1196
High Resolution Demodulation Platform for Large Capacity Hybrid WDM/FDM Microstructures Sensing System Assisted by Tunable FP Filter	1200
Diverging and Converging Beam Diffraction by a Wedge. Part II: Plane Wave Spectral Solutions and Complex Ray Solutions	1204
Phase Behaviour of an Azimuthally Magnetized Two-layered Ferrite-dielectric Circular Waveguide ...	1209
A Nonlinear Boundary Condition for Continuum Models of Biomolecular Electrostatics	1215
Concerning the Circular- and Square-loop Antennas Mounted over a Ground Plane of Finite Extent ..	1222
Electrical-optical Converter Using Electric-field-coupled Metamaterial Antennas on Electro-optic Modulator	1228
Study of Change in Enzymatic Reaction under Radiowaves/Microwaves on Lactic Acid Dehydrogenase and Catalase at 2.1, 2.3 and 2.6 GHz	1233
Principles and Methods of EMF Safety Maintenance by Individual Protective Means	1238
Experimental Study of Digital Enhanced Cordless Telecommunication Devices Electromagnetic Field Possible Hazard Health Effects	1242
Geographical Distribution of Childhood Acute Leukaemia in the Metropolitan Area of Guadalajara, Mexico and Its Correlation with the Wireless and High Voltage Network	1245
Experimental Assessment of Influence Factors of Body Shadow Effect in Dosimetry Measurements in Indoor Enclosures	1250
A Perturbative Solution to Plane Wave Scattering from a Rough Dielectric Cylinder	1254
Evaluation of the Angular Spectrum of Scattered High Frequency Radio Waves in the Anisotropic Collision Magnetized Ionospheric Plasma	1259
Stochastic Geometry for Electromagnetic Scattering Modeling	1264
A Study of Periodic Multilayered Structure in Fractional Dimension Space and Euclidian Space	1268
Electronic Counter-countermeasures in Bistatic Radars	1272
The Nonlinear Fiber-optic Channel: Modeling and Achievable Information Rate	1276
Flex-grid All-optical Interconnect Supporting Transparent Multi-hop Connection in Data Centers ...	1284
Effective Lennard-Jones Parameters for CO ₂ -CO ₂ Dispersion Interactions in Water and near Amorphous Silica-water Interfaces	1289
The C-method as an Initial Value Problem: Application to Multilayer Gratings	1297
Efficient Numerical Solution for Time-domain Volume Integral Equations	1302
Analysis of EM Emission Characteristics by Arbitrarily Oriented Microstrip Lines Based on TEM Cell Electric and Magnetic Coupling Fields	1306
Algebraic Function Approximation for Eigenvalue Problem in Rectangular Waveguide Partially Filled with Transversely Magnetized Ferrite	1310
The Transmittance of Electromagnetic Waves and Field Correlations in Multilayered Microspheres with Quasi-periodic Structures	1315
Evaluation of Power Transistors Figure of Merit for Hard Switching Commutation Mode through Experimental Analysis	1319
Improvement of Standard EM Fields Distribution in 4-port TEM Cell with Slit-structured Septum ...	1325
A Short Note on the Optimization of Halbach Arrays Used as Magnetic Springs	1328

Propagation of EM Fields through a Rotating Circular Hollow Dielectric Cylinder: Numerical Simulation in 2Ds	1333
Rapid High-accuracy Modeling Simulation Method for Full Trajectory of the Ballistic Missile	1338
Electromagnetic Forces in the Complex-octonion Curved Space	1343
Electromagnetic Force on Charged Objects with the Angular Velocity	1348
Power Spectrum Method for the Processing of the DNA in the Genome Sequencing	1353
Lorentz-like Transformations for the Velocity and Acceleration	1357
Realization of a Compact High Speed Mass Storage System	1362
Analyzing Five-layer Planar Optical Waveguides with Kerr-type Nonlinear Metamaterial Guiding Films	1366
Permittivity of Thin Quantum Dot Film with Local Field Effects	1370
New Design of All-optical Flip-flop Device Based on Multimode Interference Photonic Crystal Waveguides	1373
Ultrashort Pulse Generation in Tapered Photonic Crystal Fiber at 400 nm	1376
A Method of ISAR Sequences Quality Assessment for Aerospace Target	1380
Compensation for System Distortion Using Low Signal-to-noise-ratio Echo from Spherical Satellite ...	1385
Enhanced Efficiency of Second Harmonic Generation with Twelve-fold Photonic Quasi-crystal Fiber in Telecommunication Band	1390
Few-cycle Pulse Generation Using Solid-core Photonic Quasi-crystal Fiber	1393
Overcoming Bandwidth Limitation of LED by Using Multilevel Differential PAM in VLC	1397
Compact Waveguide Load with Thin Film Resistor	1402
Channel Equilibration in Wideband Digital Array Radar Test-bed	1406
An Ultra Low-power and Low-noise VCO Using Transformer Coupled Dual LC Tanks Topology	1411
A Reconfigurable Bandpass to Bandstop Filter Using PIN Diodes Based on the Square Ring Resonator	1415
Power Electronics for an Energy Harvesting Concept Applied to Magnetic Resonance Tomography ...	1419
Fast Time-domain Imaging for One-stationary Bistatic Forward-looking SAR	1424
Rapid Echo Simulation for One-stationary Bistatic SAR Based on FFT and Subaperture Processing .	1429
Shielding and Mitigations of the Magnetic Fields Generated by the Underground Power Cables	1436
Occupational Exposure Assessment of Power Frequency Magnetic Field in 154/31.5 kV Electric Power Substation in Turkey	1440
Effect of Renewable Energy Sources to the Stability of the Low Voltage Distribution Networks	1444
Sensor Design and Data Transfer in a Smart Grid	1449
Low-complexity Design of an 8×8 Modulation Configurable K-best MIMO Detector	1453
Analysis and Construction of Static Inverter with Multi-windings Transformer for High Power Voltage Source	1458
Modelling and Analysis of an Electro-optical System with an Off-quadrature Biased Modulator	1463
Studies on the Photoluminescence of a Novel Europium (III) Complex in Solution	1467
Metamaterial Terahertz Bandpass Filters: A Comparison between Metallic and Graphene-based Structures	1472
Some Effects of Specific Interest on the Brain of Children with Autism Spectrum Disorder (ASD): A Functional Near-infrared Spectroscopy Study	1475
Broadband Cross Polarization Converter Formed by Twisted F-shaped Chiral Metamaterial	1479
Effect of Frequent Degree of Deceiving on the Prefrontal Cortical Response to Deception: A Functional Near-infrared Spectroscopy (fNIRS) Study	1482
Light Moves Macro-objects	1486

Fabrication of a Nanoscale Plasmonic Fishnet Structure for the Enhancement of Absorption in Thin Film Solar Cells	1489
Spontaneous Formation of Square Optical Vortex Lattice in a Transverse Section of Broad-area Laser	1494
Thin Film Dielectric Gradient Optical Structures for Space Photonics	1498
3-D Microwave Scanner for Biomedical Applications: A Preliminary Prototype	1502
UWB Waveguide Breast Tumor Detection System Based on Delay and Sum Reconstruction Algorithm	1506
Axiomatics of the Blondel-Park Transformation	1510
Nonlinear Goubau Line: Numerical Study of TE-polarized Waves	1513
Unified Description of Chirped Gaussian Pulse Propagation of Arbitrary Initial Width in a Multiple Resonance Lorentz Medium	1518
Block LU Preconditioner for the Electric Field Integral Equation	1523
Permittivity Reconstruction of a Diaphragm in a Rectangular Waveguide: Unique Solvability of Benchmark Inverse Problems	1528
The Application of Non-linear Dynamics Methods for Radar Target Identification	1533
Verification of Computational Model of Transmission Coefficients of Waveguide Filters	1538
Exponential Regularization of EM Dyadic Green's Functions via Green's Function-induced Dirac δ -functions	1542
Superresolution Based on the Methods of Extrapolation	1548
Analysis of Quasi-circular Polarization in Near Field of Smart Shelf RFID Antenna Radiation	1552
Multichannel Filter Banks and Their Implementation Using Computers with a Parallel Structure	1557
Analysis of Multipactor Effect in Parallel-plate and Rectangular Waveguides	1564
Power Line Noise Measurements and Statistical Modelling in the Time Domain	1569
Wireless Transmission of Electromagnetic Energy Based on a Time Reversal Approach for Indoor Applications	1575
Use Case Analysis of Wiegand-based Energy Harvester in Mechanical Sensing Devices	1580
Tunable and Reconfigurable Frequency Rejection Circular Slot Antenna for UWB Communication Applications	1583
A Triple Band-notched UWB Antenna by Using an Arc-shaped Slot and a U-shaped Resonator Techniques	1588
Design of a High Isolation Dual-band MIMO Antenna for WLAN and WiMAX Applications	1593
A Compact Dual Band-notched UWB Band-pass Filter by Using a Stub and a Folded Stepped Impedance Resonator	1598
Miniaturized Tag Antennas with Artificial Magnetic Conductor for UHF RFID On-body Applications	1602
A Compact VHF Antenna for Smart Meters	1607
A Miniaturized Metamaterial Inspired Hexaband Antenna for GSM, GPS-L1, WLAN and WiMAX Applications	1613
Quad Band Split Koch Snowflake Antenna for LTE/WLAN/WiMAX Applications	1618
Miniaturized Multiband Antenna with Modified Split-ring Resonator for WLAN/WiMAX Applications	1623
Research on Dual Bandpass of Wide Stopband Filter with Tunable Center Frequency	1627
Effect of Slow Wave Structures on Scan Angles in Microstrip Leaky-wave Antennas	1632
Directional Emission from Chaotic Microdisk Lasers and the Role of Boundary Imperfections	1637
Spherical Microresonators Coated with a High Refractive Index Coating for Different Applications	1642
Wave-inspired Corrections for an Efficient Ray-optical Description of Micro-optics Devices	1647
Modulation of Nanolaser Output for Information Encoding	1652

FDTD Simulation of a Cylindrical Waveguide Using Longitudinal Current Distribution as an Excitation Scheme	1657
High Precision Range Measurement Processor Design with Low Complexity for FMCW Radar Systems	1662
Dynamic Speckle Laser Technique for the Characterization of Electrotechnical-porcelain	1666
Modeling of Electromagnetic Scattering from Simplified Leaf Structures by Using Spherical Wave Expansion	1670
Behaviour of Conformal Conical Frequency Selective Surfaces	1675
Time Domain Transient Analysis for Ellipsoidal and Hyperbolic Reflector Antennas	1680
A Time Domain Analytic Solution to Predict the Transient Radiation for Phased Periodic Array	1685
Local Field Effects for Left-handed Planar Metamaterials	1689
Total Internal Reflection as a Technique for Study of Surface Optical Characteristics of Left-handed Materials	1693
Evaluation of a Buckypaper's Electromagnetic Shielding Efficiency in X Band	1698
Secondary Instabilities of Steady Stationary Solution in Wide-aperture Lasers with Negative Detuning	1702
Cerenkov Radiation in Presence of Squeezed Electromagnetic Vacuum	1706
Frequency Characterization of Planar Resonators by THz Josephson Spectroscopy	1711
Dynamical Model of Elastic-plastic Hysteresis in Fullerenes Film	1716
Binary Collision with Energetic Ions of Carbon Nanotubes	1720
Applications of Carbon Nanotubes and Other Nanomagnetic Nanowires	1724
Separating the Field Radiated by Two Rectilinear Sources	1728
A Bowtie Antenna Using a Broadband Microstrip to CPS Transition Balun	1733
Two Elements MIMO Antenna for a WLAN System	1737
A Printed Inverted-F MIMO Antenna for WiFi Applications	1741
Design and Analysis of a Phased-MIMO Array Antenna with Frequency Diversity	1745
A Simple Monopole Slot Antenna with High Band-notch Characteristics for Ultra-wideband Communication Applications	1751
Design of Wideband Multi-way Power Divider with the Modified Impedance Transformer	1756
Novel Module Including a Waveguide for 40 GHz High-gain Amplifier Applications	1760
A Wideband Microstrip Line-to-waveguide Transition on LCP for 70 and 80 GHz-band Applications ..	1764
Coaxial-line Structured SMT Pad for LTCC SiP Applications	1768
InISAR Imaging of Dechirp Data under Squint Model	1772
Moving Radar Target Detection Using an Improved OFDM Chirp Waveform Scheme	1777
Methods and Experiments for the Sensing and Evaluation of Ionosphere Changes and Their Impact on the Human Organism	1782
The Parameters of a Special High Voltage Function Generator	1787
Measurement of Tissue Cultures of Early Somatic Embryos of Norway spruce	1792
Comparison Study of Layered Homogeneous Models with Detailed Human Tissue Models for Through-body Communications	1796
Analysis on SAR Values of Commercial Mobile Phones	1800
Parameter Identification of PMSM Nonlinear Part	1804
Simulation of Circulation Module	1808
Analysis of Light Absorbance on the Effects of Low Frequency Magnetic Fields on Cell Proliferation ..	1812
An Efficiency of Broadcast Mechanisms Based on Cluster Heads in Dependence on Clustering Algorithm Type	1815
Restoration of Antenna Patterns Using Iterative Method	1820

Wave Packet Propagation of Guided Optical Modes in a Thin Left-handed Film near a Frequency of Zero Power Flux	1825
Mutual Coupling between Parasitic Elements of Split Ring Resonator on Antenna	1830
An Formation Algorithm of the Synthetic Aperture in an Automotive Radar with Use of the MUSIC Algorithm	1834
Bioradar in Study of Low-power Radio Frequency Radiation Influence on Sleep of Laboratory Animals	1839
Resonant Micro-strip Lines Analog to Electromagnetically Induced Transparency	1842
Broadband Slotted Bow-tie Antennas for Terahertz Resonant Tunnelling Diode Based Oscillators	1847
Spontaneous Hemodynamic Activity in Prefrontal Cortex of Depression Patients Assessed with Functional Near-infrared Spectroscopy	1853
Strong Absorption in a 2D Materials-based Spiral Nanocavity	1858
Advanced Building Blocks in Thick Silicon on Insulator Technology: Echelle Grating Multiplexers and Reflective Multimode Interference Couplers	1864
Femtosecond Laser Irradiation of Fused Silica with a Nanometric Inhomogeneity	1870
Effect of the Rock/Water/Air Interaction on the Complex Dielectric Permittivity and Electromagnetic Waves Attenuation in Water-saturated Sandstones	1877
The Electrical Characteristics of the Rocks with Different Texture	1881
An Inverse Model for Sea Ice Thickness Retrieval Using Simulated Annealing	1885
Adaptive Boundary Approach for EMF Exposure Assessment in Broadband Measurements	1889
Topographic Effect on the Canopy Reflectance	1893
A Study of Scattering of Scatterers Using Equivalence Principle Algorithm	1897
The Wedding of Bioelectromagnetic and Biochemistry: Bridging a Molecule and Its Own Electromagnetic Information	1901
Oversensing and Undersensing of Implantable Cardiac Medical Devices Exposed to EMI	1905
Performance Evaluation of Dipole versus Modified Bow-Tie in Annular Phased Array Applicators	1909
Ensemble Formalism of the Orbital-free Density Functional Theory	1913
Microwave Tomography Technique for Concrete Diagnosis	1918
Auto-focused Imaging of a Moving Target Using an Ultra-wideband Array Radar	1922
Microwave Imaging of Dispersive Scatterers Using Vectorial Lagrange Multipliers	1926
Analysis of Radiation from X-band Slotted-waveguide Antenna Arrays Using the Parallel DDA-FE-BI-MLFMA	1932
Scattering of a Gaussian Beam by an Ellipsoidal Particle with Vectorial Complex Ray Model	1937
Computation of Spheroidal Micro-organisms Cross Sections Using the Aperiodic Fourier Modal Method	1942
A Couple of Topics in Numerical Analysis of Diffraction by a Metal Grating Using Yasuura's Method of Modal Expansion	1947
Dispersion Characteristic Analysis of Open Cylindrical Waveguide and Its Metallic Closed Model	1952
Research on Ka Rough Ocean Surface Channel Modeling Based on Stochastic Processes	1958
New Intuitive Metrics for Diversity Performance Evaluation of Multi-element Antenna Systems	1963
Double Broadband Balun Structure Using CRLH TL for Differential Excitation of Dual-polarized Self-grounded Bow-tie Antenna	1966
Research on Random Wireless Channel of Radio Indicator for Mariners	1971
Feasibility Study of Emulating Extended Spatial Channel Models in a Multi-probe MIMO OTA Antenna Test Setup	1975
Statistical Physics of Multimode Ordered and Disordered Lasers	1981
Meandering Waveguide Distributed Feedback Lightwave Elements: Phasor Diagram Analysis	1986

Magnetic Storms at High Latitudes and Slips in GPS Operating	1991
Characteristics of HF Radio Waves Propagation along Subauroral and Mid-latitude Paths over Eastern Siberia during Magnetoactive Period in February 2014	1995
Comparative Analysis of Geomagnetic Field and GPS-TEC Variations for Middle-latitude and Arctic Regions	1999
TEC Response to Geomagnetic Storms and Solar Flares as Observed with SBAS L1/L5 Signals	2004
Acoustic-gravity Waves in Space Generated by Near-ground and Volume Sources	2008
Adaptation of IRI-2012 Model for Estimation of IAR Harmonic Structure	2012
Comparison of Polar, Sub-polar and Mid-latitude Ionospheric Variability Using Ionosonde and Super-DARN Data	2017
Geomagnetic Effects on GNSS Measurements	2021
Investigation of Nanoantennas Using Surface Integral Equations and the Multilevel Fast Multipole Algorithm	2026
Weigert-effect in the Recording Media on the Base of the Polarization-sensitive Compositions	2031
Investigation of the Free-space Propagation Operator Eigenfunctions in the Near-field Diffraction	2035
Shielding Effectiveness in Coaxial Cable Connectors in Ultra High Frequency — UHF — 1 GHz to 3 GHz	2039
Optical Method for Investigation of the Parameters of the Thin Film	2042
Patterned Nano Magneticstructures	2046
Design of Double Cladding Photonic Crystal Fibers with Low-loss and Broad Dispersion	2051
Investigation on Reflection of Brillouin Dynamic Grating in Single Mode Optical Fibers	2056
Enhanced Femtosecond Optical Pulses Compression in Highly Nonlinear Photonic Crystal Fibers at 850 nm	2061
A Universal Optical Network Unit for Hybrid TDM-PON and WDM-PON Transport Systems	2065
Analogy between the Ising Model and the Polarization Switching of Vertical-cavity Surface-emitting Lasers	2069
Electromagnetic Modeling of Antenna Array Based on Circular Carbon Nanotubes Bundle	2074
A Compact Printed Spiral FM Antenna	2078
A Wideband Matching Technique for Polarization Versatile Applications	2081
Design and Implementation of a Planar Slot Antenna for SSR	2086
Design And Analysis of Uniplanar Compact Electromagnetic Bandgap Structures	2092
A Wide Stopband Filter with Source-load Coupling Technique	2095
Analysis and Implementation of a Dual Mode Cavity Band Pass Filter	2099
Propagation of Electromagnetic Waves in Cylindrical Three-layers Waveguide with Metamaterial Layer	2107
A Broad-band End Launch Double Ridge Waveguide to Coaxial Transition Using LPDA	2110
3D ISAR Imaging of Realistic Target Model Based on General Purpose EM Simulators	2115
A Comparison of SAR Imaging Performance between Matching Filter and Compressed Sensing	2119
Micro-motion Target Detection Based on Wall Envelope Alignment in Through-the-wall Ultra-wideband Radar	2124
Analysis of a Polycarbonate RFID Tag for Blood Chain Tracking	2129
28 GHz Delay Spread Measurement Using a Broadband Channel Sounder in Small Urban City	2132
Minimum Sum Algorithm Decoder for LDPC Nonregular Parity Check Matrix in BPSK System	2136
Asymptotic Analysis of Scattering from Transmitarray for Near Field Focused	2145
Investigation on Rudimentary Geometries of Dielectric Resonator Antenna	2149
Two-sided Inverted F Antenna with LTE, GSM, WLAN, WiMax Frequency Bands for Mobile Phones	2153

Analysis of the Imaging Realization of Frequency Modulated Continuous Wave Circular SAR	2158
A New Sidelobe Reduction Method for Circular SAR	2163
Terabit WSDM Optical Access Network Using Multicore Fibers and Advanced Modulation Formats ..	2168
RF Dynamics of Mode-locked Intracavity Frequency Doubled Laser	2173
Photonic Integrated Circuits for Electro-optic Microwave Frequency Multiplication and Frequency Trans- lation: Spurious Harmonics Suppression by Design	2177
Design of a Printed Antenna for Mobile Terminals	2182
A Wideband Circularly Polarized Antenna with Wilkinson Feed Network for Worldwide UHF Band RFID Reader	2186
A Small Printed Antenna for Bluetooth Wireless Communication	2190
Measurement of the Dielectric Properties of Micaceous Minerals Using Scattering Parameters	2195
An Intelligent Platform for Effective Management of Time-consuming Electromagnetic Simulation Prob- lems	2199
Two-dimensional Spatial Frequency Technique for Calculating Electromagnetic Scattering from Large Objects	2204
Development of ADI-FDTD Methods with Dispersion-Relation-Preserving Features	2209
A Variational Method to Solve Maxwell's Equations in Singular Axisymmetric Domains with Arbitrary Data	2215
Semi-analytical Modeling of Single Loop Inductive RF Sensors Used to Sense and Locate Inclusions in Dielectric Media	2220
Chaos Control in Virtual Cathode Oscillator by Cathode Structural Optimization	2225
Rigorous Optimizations of Three-dimensional Antenna Arrays Using Full-wave Simulations	2230
Numerical Modeling of Light/Matter Interaction at the Nanoscale with a High Order Finite Element Type Time-domain Solver	2235
Photonic-based Millimeter Wave Wireless Link	2242
Plasmonic Terahertz Emitters and Detectors for Sensing and Wireless Communications	2247
Terahertz-wave Integrated Circuits Based on Photonic Crystals	2254
Computation and Analysis of Terahertz Wire Grid Polarizer Self-resonance Using Transmission Line Theory	2260
Simulation and Design of a Heterogeneously Integrated III-V/Silicon Dual-wavelength Laser	2264
The Optimisation and Analysis of Multi-moded Feed Horn Structures at Terahertz Frequencies	2268
Simultaneous Generation of Terahertz and X-ray Radiation with Ultrashort Femtosecond Laser Pulses in Nano-cluster Medium	2273
Optical Frequency-interleaving Full-duplex Technique for Fiber-optic Transmission of Millimeter-wave- band Frequency-modulated Continuous-wave Downlink Signal and 10-Gb/s On-off-keying Uplink Signal	2276
2D and 3D Modeling of Electro-optic Effect in Whispering Gallery Mode Optical Microresonators	2281
Optical FM-CW Signal Generation for a Terahertz Radar System by Higher-order Optical Modulation	2287
Compact 60 GHz Hybrid Integrated Photoreceiver Module with 1.5- μm InAs Quantum Dot SOA	2292
Enhancement of SPR-sensor Sensitivity in Magnetophotonic Plasmonic Heterostructures	2296
A Simulation Based Distributed MIMO Network Optimisation Using Channel Map	2301
Realization of a Flexible Technological Demonstrator for HF Sky-wave Data Links	2305
GPU-accelerated Stochastic-FDTD Study of Lightning-induced EM Fields over Non-deterministic Ter- rains	2310
On the Limits of Numerical Modelling of Electromagnetic Field Coupling through Small Apertures ..	2315

Determination of Optimal Pairs of Radii of Dielectric Samples for Complex Permittivity Measurement of Dispersive Materials	2320
On the Possibility of Water Detection under Asphalt Layer Using Microwave Radar System	2326
Detection of Discontinuities in the Samples of Changing Sizes with ANN-based Technique	2329
The Scaled Gradient Projection Method: An Application to Nonconvex Optimization	2332
Inverse Source in a Multipath Environment	2337
Design and Analysis of Tunable Photonic Devices Based on the Co-integration of Graphene and Dielectric Waveguides	2342
Dyakonov-like Plasmonic Localized Waves on Graphene Metasurfaces	2347
Analysis of Graphene Plasmonic Waveguides and Switching Components via a Finite Element Formulation with Surface Conductivity	2352
Reconfigurable Antenna Design	2357
A Utility Maximization Approach to MAC Layer Channel Access and Forwarding	2363
Multi Band Metamaterial Based Bowtie Antenna for Wireless Applications	2368
Effect on Lefthandedness from SRR Rotational Disorder	2372
Design and Analysis of Metafractal Antenna for Wireless Applications	2376
Low Power WSN and Cloud Infrastructure for Remote Lake Water Quality Monitoring	2381
Coplanar Waveguide Fed Coplanar Patch Antenna for Nanorectifiers at 2.45 GHz	2386
UWB Antenna with Optically Controlled Notches	2390
Efficient Optical Fiber Coupling to Whispering Gallery Modes of Optically Manipulated Emulsion Microdroplets	2394
Operating Speed Extension of SOA External Modulator Using Microring Resonator	2399
Developing Microwave Photonic Temperature Sensors	2403
Magnetic Field Controlled Microwave Hybrid Oscillations in Composite Resonator Dielectric-weak Ferromagnet	2408
Three Dimensional Ablation Flow Produced by Ultrashort Laser Pulse from Perfectly Flat Target ...	2413
On Different Regimes of Condensed Matter Ablation Depending on Intensity and Duration of Absorbed Electromagnetic Pulses	2418
Femtosecond Laser Ablation of Thin Films on Substrate	2422
All-laser Fabrication of Metallic Nanoantenna with Planar Lens for Surface Plasmon Polaritons	2427
Two-temperature Heat Conductivity of Gold	2431
Dissipative Magnetorotational Instability: Wavelength Asymptotic Saturation	2436
The Efficiency of a Hydrogen Circuit in a Smart Grid	2440
Advanced Methods of UHF EM Diagnostic of Discharge Activity in High Voltage Transformers Dielectric	2445
Numerical Model and Analysis of a Graphene Periodic Structure	2450
Magnetic Field Shaping with Quasi-Periodic Resonators	2455
Control of Breath Simulator	2459
Golomb Ruler Sequences Optimization for FWM Crosstalk Reduction: Multi-population Hybrid Flower Pollination Algorithm	2463
100-Gb/s Point-to-point Solutions for Long-reach Passive Optical Networks in Sparse Rural and Urban Areas	2468
Numerical Analysis of Artificial Neural Network and Volterra-based Nonlinear Equalizers for Coherent Optical OFDM	2473
Quantum-dot Semiconductor Optical Amplifiers: Novel Technique for Gain Management and Noise Suppression	2478

Parameters Identification of Controlled Systems with Electrical Drives Using Genetic Algorithms	2482
Model of Voltage Source Inverter for Estimation Methods with Observers	2486
Model of Power Electronics Used for Electric Vehicles Contactless Charging	2490
Elimination of Undesirable Transients in Direct Torque Control of Induction Motor	2495
Compensation of Disturbed Load Currents Using Active Power Filter and Generalized Non-active Power Theory	2500
Combined Magnetic Bearing	2506
Induction Motor Drive Predictive Control Method Analysis and Comparison with Fundamental Direct Torque Control Method	2510
Electric Vehicle Control Based on GPS and GSM Path Parameters	2514
Railway Traction Vehicle Longitudinal Velocity Estimation by Kalman Filter	2518
Analysis of the Electromagnetic Field of Electric Machines Based on Object-oriented Design Principles	2522
Locomotive Wheel Speed Measurement under Wheel Slip Conditions	2528
Ionosphere Response to Stratospheric Circulation in High-midlatitudes	2534
The Possibility for Full Profile Incoherent Scatter Data Processing on the Base of the Simplex-processor Algorithm	2539
Analysis of Speed and Acceleration of GPS/GLONASS Phase in the Polar Ionosphere	2544
Estimation of GPS/GLONASS Differential Code Biases and Their Long-time Variations	2548
Variations of O+/H+ Transition Height over East Siberia from Joint Analysis of Irkutsk Incoherent Scatter Data and GPS Total Electron Content	2553
The Study of the Ionospheric Dynamics during Strong Sudden Stratospheric Warmings in the Russia's Arctic Region	2557
The Stratosphere Jet Stream Effects in High-latitude Ionosphere according to Vertical Radio Sounding Data	2562
Simulation of HF Ground Backscatter Measured by the Ekaterinburg SuperDARN Radar. Comparison with Observations	2567
Correction of the Ekaterinburg SuperDARN Data Mapping Using Ionospheric Vertical Sounding	2572
Space Weather Variations and Corpuscular Ionization	2576
Arctic Ionosphere Imaging and GNSS Tomography	2580
Identification of Abnormal Blood Cells Using Scattering of a Focused Laser Beam by a Cluster	2585
Waveguide Hyperthermia Applicator with Circular Polarisation	2589
Study of Hot Spots by Oncological Patients with Metal Implants in Head and Neck Region	2593
Novel Microwave Applicators Inspired by Metamaterials for Hyperthermia Treatment of Cancer	2598
Phased Arrays Pre-treatment Evaluation in Antitumoral Hyperthermia	2602
Complex Permittivity Measurement in Hyperthermia Treatment Planning	2608
Feasibility Study of Microwave Interstitial Applicator Array for Treatment Pancreatic Cancer	2613
Design of the Wide-tuning-range Notch Filter with Wide Constant Absolute Bandwidth	2618
Sierpinski Gasket Fractals Implemented as Electromagnetic Band Gap (EBG) Structures on a Multiband Antenna for WLAN/WiMAX Applications	2622
Improvement in Planar Array Antenna Performance by Using Center-fed Coaxial-to-SIW Transition and UC-EBG Structure for 60 GHz Wireless Communication	2627
S-band Proximity Coupled Patch Antenna Based on TiN/Ag Multilayer Material	2632
Effect of Complementary Split-ring Resonators on Beam Scanning in the CRLH-leaky Wave Antennas Based on Split-ring Resonators and Slotline	2636
A Compact Band Pass Filter with Wide Stop-band in LGA Package by Low-temperature Co-fired Ceramic	2639

A Compact Tunable Dual-band Bandpass Filter Using Varactor-loaded Step-impedance Resonators . . .	2642
Concentric Open End Rings Resonator Filter	2646
On the Characteristics of Spoof Surface Plasmons (SSP) in the High Frequency Limit	2651
Investigation the Possibility of Obtaining Spiral Light Beams with Adjustable Parameters	2656
Structured Laser Radiation in Optical Inhomogeneous Media Refractography	2660
The Effect of Iron Nano-inclusions in Multilayered Integrated Optical Waveguides	2665
Various Microbubbles Generation by Light Excited Graphene Oxide Heater	2670
A High Survivability Mesh Topology FBG Based Optical Sensing System with SDN Controlling	2675
Determination of the Parameters of Composites with Magnetic Particles from the Study of the Spectra of Ferromagnetic Resonance in the Microwave Frequency Range	2680
Microwave Absorption Properties of Foam Glass Material Modified by Adding Ilmenite Concentrate	2684
Significantly Improved Absorption Properties at Microwave Bands for Multi-layer Hexaferrite Thick Film Composites	2687
Nonlinear Optical Phenomena in Iron Oxide Containing Magnetic Nanocolloids	2692
Effects of Target Reflectivity on the Reflected Laser Pulse for Range Estimation	2695
Spatio-temporal Visual Saliency for Adaptive Weather Sensing	2700
A Novel Approach to Counter the Low Observable Characteristic of Stealthy Targets by Analyzing the Radar Cross Section	2705
Ultra Short and High Voltage Pulse Shaping for Atom Probe Tomography Improvement	2709
On the Coneigenvalue Decomposition of Sinclair Matrices	2714
Current Control of the Matrix Converter Fed Induction Motor Drive	2719
Physical Meaning of an Induction Machine Dynamic Model	2723
Control Strategy of Grid Connected Converter under Unbalanced Conditions	2727
Windowing Effect on Electromagnetic Interference and Efficiency at Using Pulse Width Modulation Techniques	2731
Analysis of Multi-resonant Circuitin Overloading States	2736
Mutual Inductance of Two Helical Coils — Theory, Calculation, Verification	2741
Application of Meta-materials in the Ports of Conveyor Belt Microwave Heating Systems	2749
Enhance the Protection Capability of Intentional Electromagnetic Interference with Inductive Gas Discharge Tube	2753
Demonstration of Multi-beam Microwave Heating Based on the Wave Confinement of Hexagonal Photonic Crystal Multilayered Cavity	2756
Design and Implementation of a Reliable Wireless Real-time Home Automation System Based on Arduino Uno Single-board Microcontroller	2760
Correlation Characteristics for an Event/Sports Center at 3.2 GHz	2765
Hidden Markov Models Based Channel Status Prediction for Cognitive Radio Networks	2770
Modified Lowest ID Algorithm for Practical Wireless Clustered Network	2774
Using Antenna Diversity to Improve Wake-up Range and Probability	2779
Interference Aware Iterative Receiver Performance for the Uplink of LTE-A	2784
Physical Layer Security Scheme Based on Power Efficient Multi-antenna Transmitter	2790
Experimental Characterization of In Vivo Radio Channel at MICS and ISM Bands	2796
Performance of Ultra-wideband Body-centric Wireless Networks	2800
A High-Q Linear CMOS Digitally Controlled Accumulation-mode Varactor Array for Multiband RF Circuits	2805
A V-band Balanced MMIC Power Amplifier	2809

Ultra-wideband Butler Matrix Fed MIMO Antennas	2815
CRLH Waveguide Based Ka-band Beam-steering Leaky-wave Antenna for Radar Application	2820
Aperture Coupled Microstrip Antenna with Three Resonants	2824
Design, Simulation, and Fabrication of Low-cost Inkjet Antennas	2829
Design of Integrated Triple Band Notched for Ultra-wide Band Microstrip Antenna	2834
Pattern Reconfigurable Antenna Using Non-uniform Serpentine Flexure Based RF-MEMS Switches ..	2840
Compact Band Notched UWB Filter Based on Open-load Stub	2844
Metamaterial Inspired Compact Antenna for UWB and GPS Applications	2848
A Low-profile Wideband RFID Tag Antenna Attached to Metallic Surfaces	2854
A Long Range UHF RFID Tag for Metallic Objects	2858
Measurement of Electromagnetic Activity of Living Cells	2863
Author Index	2868
